## Welcome to our Local Plan Partial Update Issues and Options Consultation

Thank you for taking the time to take part in our consultation on the future of the Cotswolds and helping to play your part in helping to shape our area.

Tackling the Climate Emergency is an issue we are deeply committed to addressing. This means we are consulting on a partial update of our Local Plan to make sure that we are thinking sustainably for the next, and future, generations. We are also consulting on some other areas of the plan we believe need updating. You can find out more about Local Planning by reading our 'Learn more about local planning' section or visiting our website.

## Green Infrastructure

### Introduction

The [National Planning Policy Framework](#) defines Green Infrastructure (GI) as "A network of multi-functional green and blue spaces and other natural features, urban and rural, which is capable of delivering a wide range of environmental, economic, health and wellbeing benefits for nature, climate, local and wider communities and prosperity".
